Dear Sir:

This amendment is supplemental to the amendment filed July 16, 2003 which was responsive to the Final Office Action dated April 16, 2003. Because the prior amendment was fully responsive to the last action, applicants submit that no extensions of time are required.

In view of the amendments to the claims and the remarks put forth below, reconsideration and allowance are respectfully requested.

Atty Dkt. No.: \$TAN-153 USSN: 09/898,745

AMENDMENTS

In the Claims

1. (Currently Amended) A method for identifying a bioactive compound, the method comprising the steps of:

contacting a yeast host cell containing a beterozygous deletion in a target sequence with a candidate bioactive compound; and

detecting expression of a stress response gene by the host cell in response to said contacting, wherein the stress response gene is at least one of IISP26, IISP12, IISP42, IISP78, HSP82, YBR072W, YBL049W, YFL030W, YGR043C, YHR096C, YLR142W, YMR081C, YMR107W, YNL194C, YJL144W, Y1.R080W, YLR178C or YMR090W;

wherein detection of no significant increase in expression of the stress response gene as compared to expression of the stress response gene in a control host cell indicates that the candidate bioactive compound has activity as a drug and that the host cell having the heterozygous deletion is sensitive to the drug activity of the compound.

2.-3. (Cancelled)

4. (Currently Amended) The method of claim 1, wherein the yeast host cell comprises a stress response gene reporter construct, wherein expression of the stress response gene reporter construct is indicative of expression of the stress response gene a stress response in the yeast host cell.

5. - 6. (Cancelled)

7. (Currently Amended) The method of claim 1, wherein at least two or more yeast host cells, each having a heterozygous deletion in a different target sequence, are contacted with a candidate <u>bioactive compound</u> dreg, and wherein expression of a reporter gene construct in each yeast host cell provides for a unique detectable signal for detection of reporter <u>stress</u> response gene expression.
